MACo President's & Officers' Report: Joe Briggs, Cascade County, MACo President

- Succession Planning: Meeting next week to finalize; starting to put money aside for search and for a dual role to have successor work with Executive Director for a while (it's in the budget)
- SIGB: Talking about using E-9-1-1 "stranded funds" (no "excess funds" really--provider money not being claimed by some providers); we've been trying for six months to get information on who is using the system (Lewis & Clark and Flathead Counties so far); highway patrol would like counties to pay
 - INPUT: Harold Blattie - E-9-1-1 fee paid by cell user is then split between provider and PSAPs; providers need to apply and provide their subscriber base to get their money; smaller telcos are doing it, but the larger providers are not—growing pot of money. There was a bill passed to distribute some of the money, but it's still growing. The Energy & Telecommunications Interim Committee is looking at this issue.
- FirstNet: Federally mandated first responder data network - real time data & medical records; SIGB put forward first version of survey responses to federal government (waiting for response); years away from deployment; we're in the last 5% to get it
- Jail Advisory Group (JAG): Jail Standards—JPIA credits; no downside to adoption
- Bylaw Amendments
 - Conference Site Selection: Rotation based on who can handle the conference; if new facility built, it can be reviewed for inclusion in the rotation
 - Executive Director: Executive shall set the salary of the Executive Director—removing requirement that there be a survey done, as it's not effective for professional performance review; survey will still be distributed, but won't be the primary tool for the review of the Executive Director
 - Recent Performance Evaluation of Executive Director: 3% increase in salary
